

## Assignment -4

1. a

2. c

3. c

4. c

5. c

6. b

7. b

8. b

9. c

10.

Registration ID:

- The valid class is R, which stands for Registration ID.
- Any character other than R is an invalid class.

Area (Chd)

- CH is a valid class that denotes a certain location. Any other two-letter combination that does not correspond to a valid region is considered an invalid class.

### Number of Branch

- If the number of branches falls within this range, the valid class is 01 to 99.

Any non-numeric input or values that fall outside of the designated range are considered invalid classes.

### The year

- Valid class: 00 to 99, which stand for the year's final two digits.

Any non-numeric input or numbers that are outside of the range are considered invalid classes.

### ID for registration

- Valid class: 0000 to 9999 (which stands for the branch and year registration number).

Any non-numeric input or numbers outside of this range are considered invalid classes.
