

Activity2: Bug Reporting

The screenshot shows a web form titled "New Registratio" (partially visible as "New Registratio"). The form has a yellow background and a light blue border. It contains the following fields and elements:

- Choose User Id:** A text input field containing "T\$1Dw_5&". To its right is the label "Enter User ID".
- Password:** A text input field containing "*****". To its right is the label "Enter Password".
- Confirm Password:** A text input field containing "hello123".
- Name:** A text input field containing "Tester1.1 and Tester 1.2".
- Email:** A text input field that is empty. To its right is the text "(Requires verification. Will not be published.)".
- Country:** A dropdown menu showing "India" with a small downward arrow icon.
- Verification:** A small image showing a verification number "4" with a green checkmark. To its right is the text "Please enter the verification number exactly as shown in left." and a text input field containing "r".
- Register:** A button labeled "Register" located at the bottom right of the form.

The "Choose User ID" should be a dropdown list or a selection field that displays a list of already registered user IDs.

The entered password ("*****") should match with the confirm password ("hello123").

The entered password ("*****") is masked, but the confirm password ("hello123") is visible as plain text, which compromises security.

There is no option for users to view the entered passwords if needed using toggle or eye button.

The CAPTCHA field requires users to input the code shown in the image. The entered code ("r") does not match the visible CAPTCHA code.

The "Name" field contains both "Tester1.1" and "Tester1.2," which might not be properly validated or formatted.

"New Registratio" heading is misspelled, the "n" is missing.

The "register" button is not correctly spelled.

Email field should give warning message with text "email required" if left the email field blank.
